

## HIRING:

# Software Integration Developer TO HELP OUR CLIENTS EXCEED

Within Accell we are working on a fit for the future digital landscape. This includes migrating multiple regional IT systems worldwide to the latest technologies within the Accell Group. Therefore, we are looking for a full time Integration Developer to join our team at Heerenveen and occasionally Amsterdam.

We are Accell IT, Accell Group's IT company. Our innovative IT solutions enable Accell Group to become the consumer-oriented market leader in the e-bike market. Batavus, Koga, Haibike and Lapierre are some of our best-known brands. We combine our IT expertise with our knowledge of the bicycle industry to develop first-class IT solutions for our customers and partners.

### What will you do?

As Integration Developer at Accell you will be responsible for building integrations for all Business Applications (CRM, ERP, Web, BI, Third Party Integrations, etc). You are able to translate business requirements into a working solution, while maintaining overview and setting priorities. The latest techniques and methodologies in the field of integration software have no secrets to you. Next to that you are experienced in an Agile way of working and Scrum. You also have a sound understanding of ESB, SOA and BPM. Does this sound familiar? Then perhaps you are the person we are looking for!

### Your focus:

- Participate in all phases of the software development lifecycle, including discovery, analysis, requirements, estimations, solution design, configuration, code development, testing, deployment and support (DevOps)
- Responsible for building Integrations (Mule 4) between business applications (such as Infor, Salesforce, Web Portals, BI) and 3rd party systems and applications.
- Responsible for designing, building and documenting new API's for third party consumption.
- Collaborate cross-functionally with technical as well as non-technical stakeholders to gather and understand the requirements
- Understand and implement secure credential management options and proper encryption practices
- Control integration quality and develop ways to detect and correct anomalies with data exchange
- Develop monitoring and alerting process, monitoring data and process integrity, whilst building the integrations for scale for all Accell businesses
- Be a self-driven professional and a true team player with solid verbal and written communication skills
- Dutch and English lingual both oral and written

## Who are you?

- BSc or MSc in Information Systems, Computer Science or other relevant degree
- 2+ years hands on experience developing solutions on integration platform
- Familiarity with business applications; such as ERP, CRM, Portals.
- Must be proficient with Data transformations

## Nice to have:

- Experience in design, developing, testing, implementation, and documentation of API design
- Experience working with messaging infrastructures
- Solid Programming skills using JAVA or .NET
- Knowledge of DB integration, experience with major relational databases
- Experience working in team environment (GIT, Azure VSTS / DevOps, Jenkins or similar)
- Good understanding of Enterprise Integration Architecture patterns
- Experience in building common services framework for logging, error handling, configuration, authentication and authorization
- Experience in continuous integration and continuous deployment

## What do we offer?

- Great colleagues in an informal and flexible team;
- A full-time position in an international organisation, full of ambition.
- Great business where we make great bikes;
- Professional environment where we work with the latest technology;
- A competitive salary and good secondary conditions of employment.
- Plenty of opportunities for professional and personal development to further support innovation.

## Accell Group & Accell IT

Accell Group focuses on the middle and higher segments of the international market for bicycles and bicycle parts and accessories. The company is a market leader in both Europe and the United States. Accell Group's best-known brands are Haibike, Winora, Batavus, Sparta, Koga, Lapierre, Ghost, Raleigh and Diamondback, Tunturi, Atala, Redline, Loekie, and XLC. Approximately 3,000 people work for Accell Group worldwide.

Accell IT is one of Accell Group's subsidiaries. With approximately 80 employees, we provide a variety of IT services to the other Accell organisations worldwide, ranging from workplace management to the ERP system developed in-house. Accell IT is located in Heerenveen, next to Accell Group's head office. You can find more information about Accell IT and the team, as well as our corporate video, on [our website](#).

## Interested?
